Product Benefits & Features

TwinTech® No Frost - food kept hydrated and juicy
TwinTech® No Frost has an advanced dual cooling system for the fridge and freezer. This technology ensures the freezer stays frost-free and the fridge humidity optimal, preventing the food from drying out.

Consistently cool, with DynamicAir
DynamicAir makes sure that the environment inside your fridge is kept at a stable temperature. It works by circulating cool air throughout, meaning that even when the door is opened, your food is protected from heating up.

The Touch Electronic Control on Top offers easy access to functions
Precisely set the temperature and easily access the Fridge Freezer functions, thanks to the clear display of the Touch Electronic Control on Top.

Make room for tall items with FlexiShelf
With FlexiShelf, you can reorganise the interior of the fridge however you like. The movable, half-depth glass shelf can slide back, extend fully, or just halfway, to make room for taller items. The right flexibility for all storage needs.

Maintain perfect texture with FastFreeze
The FastFreeze system freezes fresh foods quickly so that vitamins, textures, flavours, and all healthy qualities are better preserved.

- TwinTech® NoFrost: Dual cooling keeps humidity in the fridge to prevent food from drying out, while the freezer stays frost-free.
- Extra cool: The temperature drops for a set time to quickly chill large amounts of food, then returns to normal—ideal for parties or BBQs.
- DynamicAir: The fan ensures efficient circulation of cold air in the refrigerator.
- Open Door Signal: Visible & audible.
- Sliding fittings: Attach a matching cupboard door, using sliding rails and cabinet-hinges.
- Control type: Electronic temperature control with touch control and LCD screen.
- Designed and manufactured in Europe by AEG.
